The regiment was activated from a horse-drawn artillery battalion in Komarom (P 48/Y 75) on 1 November 1949 and was stationed there up to March 1950. (1)

Although the ordnance officer went to Budapest in late May 1950 to pick up additional guns, no guns had arrived prior to the day of desertion. From 10 to 15 unused mortars were stored in an ordnance building of the barracks installation. Prior to early 1950, the regiment was equipped with 14 small trucks, 2 x 3-ton Raba trucks, 3 GMC trucks, and 2 passenger cars. From 35 to 40 trucks of various types came in during early May 1950.
5. The officers and the EM participated in two mandatory political indoctrination lessons weekly. Also, political two-hour evening seminars for beginners and advance students were held on two days weekly. The officers and the NCOs

#### [redacted] Comments.

- (1) Previous reports stated that an artillery unit was located in Papa. See [redacted] the motorized artillery regiment in Papa was observed [redacted] with an artillery battalion in Kiskorees in March 1951, which, however, does not necessarily prove that the unit [redacted] was located in Kiskorees in March 1951. For sketch of barracks installation in Papa, see Annex 2. 25X1 25X1 25X1B
- (2) Although source worked in the administration offices, the information on the unit's T/O is incomplete.

- (3) A Lieutenant Colonel Sander Hazi was mentioned in the April 1950 issue of the Hungarian gazette. Since there is a shortage of reliable Communists among the Hungarian senior officers, it seems quite possible for a Lieutenant colonel to be in command of a division. Captain Pal Doornstoer was identified as commandant of the ration supply depot in Szombathely in 1949.

- (5) The border guard training battalion has been repeatedly confirmed in the former Nadasdy Barracks; the latest report was dated January 1949.
